Customer Reviews

It has so many errors, you better stay away from this book. These are not just printing errors but incorrect results too. For example on page 52: On the top of the page they are teaching how to calculate the area, and the $4\frac{2}{7} \times 6\frac{3}{8}$ is $24\frac{3}{28}$ for them instead of the correct $27\frac{9}{28}$. And this is not the only problem on the same page. For example: "The Chang lawn measures $2\frac{3}{7}$ acres by $1\frac{2}{3}$ acres." If it is true, what is the area? Square acres? Ridiculous! 4 errors (grammar not

counted) on one page, and the list of pages just goes on-and-on. These books supposed to teach our kids...

Danger! Same content as "Enrichment Grade 5." This was completely ridiculous.

Really good ,.

5th grade teacher.. love it!
